Kukudhi, Kaundhiyara, Prayagraj, India 212106

SUMMARY

Dynamic Full-Stack Developer and AI Engineer specializing in the MERN Stack and Artificial Intelligence protocols. Experienced in creating scalable end-to-end applications with strong problem-solving skills rooted in Data Structures and Algorithms. Collaborative team player with a proven track record of leadership in hackathons, achieving multiple podium finishes, and driving continuous learning through technical workshops.

EDUCATION

United College of Engineering and Research

B.Tech in Computer Science (AI & Machine Learning)

Prayagraj

Expected May 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Machine Learning Fundamentals, Web Development.

Intermediate (Class XII)

PCM Stream | Scored 87%

UP Board

May 2023

INTERNSHIPS / PROFESSIONAL EXPERIENCE

Unstop

Campus Ambassador

Remote / Campus

Sep 2025 - Present

- Spearheaded the organization of 5+ technical events and hackathons, demonstrating strong leadership by facilitating the participation of over 200 students in national-level competitions.
- Acted as a primary liaison, increasing campus engagement with the platform by approximately 30% through targeted communication and outreach strategies.

IBM

Web Development Intern

Remote

Jun 2025 - Aug 2025

- Collaborated with a cross-functional team to develop and deploy a scalable full-stack e-commerce platform using the MERN stack, optimized to handle 500+ concurrent users seamlessly.
- Implemented secure RESTful APIs with Postman, systematically reducing data retrieval latency by 20% and ensuring robust authentication.

PROJECTS

Satyamev-Chain Personal Project | [GitHub](#)

- Engineered a decentralized blockchain application for transparent civic data management, processing immutable records that improved local data accountability by an estimated 40% for targeted user groups.
- Implemented immutable data structures to solve civic challenges, creatively differentiating the system from generic Web3 platforms.

Technical Environment: Blockchain, Web3, Full-Stack Architecture.

Mudra-Vani (Sign Language Translator) Personal Project | [GitHub](#)

- Developed an accessible universal sign language translator using computer vision, successfully recognizing 50+ distinct gestures to convert real-time hand movements to text.
- Optimized the deep learning model for low latency, achieving a rapid processing speed of under 200ms per frame for fluid communication.

Technical Environment: Python, OpenCV, MediaPipe, TensorFlow.

ShoppingKart (E-Commerce) Personal Project | [GitHub](#)

- Architected an advanced e-commerce platform with secure JWT authentication and Stripe payment processing, handling a simulated catalog of 100+ products seamlessly.
- Designed an intuitive admin dashboard and order tracking system, integrating Cloudinary for dynamic product image management.

Technical Environment: MERN Stack, JWT, Stripe, Cloudinary, Node.js.

Krishi Seva 2.0 Hackathon Project | [GitHub](#)

- Collaborated in a hackathon team to engineer a crop analysis platform, integrating Machine Learning models that achieved 85% accuracy in soil health analysis.
- Provided real-time crop recommendations, creating a solution with the potential to improve yield predictions by 15% for local farmers.

Technical Environment: Flutter, Firebase, Machine Learning, Google Cloud Platform.

TECHNICAL SKILLS

- Languages:** C++, Python, JavaScript (ES6+), HTML, CSS.
- Frameworks:** MERN Stack (MongoDB, Express.js, React, Node.js), Next.js, Tailwind CSS.
- AI/ML:** OpenCV, DeepFace, Computer Vision, TensorFlow, Python Data Libraries.
- Tools & Platforms:** Git, GitHub, VS Code, Postman, Vercel, Firebase, Ollama.

ACHIEVEMENTS & CERTIFICATIONS

- 3rd Position:** GDGOC Hackathon 2025 (Google Developer Groups) for project 'Kumbh Rakshak'.
- 1st Rank:** GeeksforGeeks DSA Contest - Secured 1st position in Week 3 & Week 7.
- Hackathon Participations:** NASA Space Apps Challenge, HackDiwas 2.0 & 3.0 (United University), Yukti 1.0 (BBS), ZennoVatio Hackathon (Chandigarh University), GDG Hackathons.
- Certifications:** MERN Stack Development [IBM, Aug 2024], Python Programming [UCER, Jul 2023].
- Workshops & Extracurriculars:** Attended 5+ NLP/IoT workshops. Active Member in College Music Band, Runner-Up Cricket Team Member in intercollege tournament.
